

sustainability [noun]

- ❖ The ability to be maintained at a certain rate or level
- ❖ Development that meets the needs of the present without compromising the ability of future generations to meet their own needs.
- ❖ To create and maintain the conditions under which humans and nature can exist in productive harmony to support present and future generations.

Acknowledgement

"We do not inherit the earth from our ancestors we borrow it from our children." – Native American Proverb.

This is something that resonates with me and those who work here at Rockingham Forest Park. We take the approach that sustainability is a process that integrates environmental, social, and economic considerations into decision making, whilst ensuring we are creating a park that takes you back to nature and it's beauty whatever the season. We are creating a thriving and healthy natural habitat, whilst improving the customer experience without increasing the use of natural resources beyond the capacity of the environment to supply them indefinitely.

Commitment

Minimise waste by evaluating operations and ensuring they are as efficient as possible. Actively promote recycling internally, and amongst our customers and suppliers. We aim to meet and exceed all the environmental legislation that relate to the Park.

Our Park is an important ecosystem for birds, bees, mammals, and invertebrates. We have adapted our park grounds to create a welcoming environment for the local wildlife, all lighting around the park is low lighting so as not to effect light pollution and the affect the bat fly zone that goes through the park, we have two bug hotels, when a beehive is discovered, we contact the local bee keepers so that they can be removed and taken to a local bee farm, we are now looking at bird and bat boxes so watch this space.

We want you to **Breathe, Explore, Relax**

please help us to **Reduce, Reuse, Recycle**

Kuljit Senth (Mrs)
General Manager
